

Save Time And Money

With Real-Time
Information Management.

The Next Generation In Safety Equipment Information Management.

i-Safe™ 2.0 Saves Time And Helps Keep Your Workers Safe.

The innovative i-Safe™ Intelligent Safety System from DBI-SALA has been improved and upgraded to help make managing a safety program easier and more cost effective. The web-based system consists of a web portal for easy information management and a mobile device for on-site inspections. The system allows you to easily record and access information on inspections, inventory and user information. Track equipment assignments by worker or location. View or download safety and equipment instructions, access links to safety standards and more!

Key Benefits Include:

- **Saves Time**-Reduces time by over 35% compared to paper-based systems ultimately lowering your cost.
- **Data Accuracy**-Real-time data provides accurate reports and up to date information.
- **Custom Setup**-Data entry can be customized to fit your application.
- **Mobile Inspections**-Mobile reader allows for in the field inspections and information management on the job site.
- **Web-based**-Information is stored and updated to a database with easy access anytime.

How It Works

The i-Safe™ system is equipped with RFID (radio frequency identification), a wireless data collection technology. RFID technology has the ability to identify, track and assign information to unique items without direct contact or line-of-sight scanning. i-Safe™ consists of passive RFID tags (transponders) that can be scanned by mobile readers (receivers) that synchronize data to a web-based secure information portal.

Almost all DBI-SALA products are RFID enabled. They are equipped with an RFID tag and are ready to be added to your i-Safe™ database.

Simple And Accurate

The inspection process is a simple process:

- 1) Scan the tag to read the RFID number
- 2) Access and complete the inspection and save the action
- 3) Sync the mobile device to the portal and save the information to the database
- 4) Data is pushed back to update the mobile device

Retrofit Any Brand Of Safety Equipment With i-Safe™

As part of the DBI-SALA commitment to safety innovation, you can now include all of your inventory within the i-Safe™ system.

i-Safe™ retrofit tags are available for all brands of harnesses, lanyards, self retracting lifelines or other equipment such as tools, ladders, and fire extinguishers.

Real-Time Information At A Glance!

The i-Safe™ custom web portal provides accurate information in an easy to navigate web site. Top level navigation provides 6 tabs with drop down menus.

My i-Safe™ Dashboard

Provides a daily snapshot of the inspection history, inspections due and inventory status at a glance. Moving history keeps information accurate day to day.

Tasks

Customization of your database by input of equipment, sites and workers to suit your needs. Perform and record inspections on the portal.

Reports

Outputs reports for all key inputs including inspections, equipment inventory, sites and workers. Complete with filtering and sorting capabilities.

Resources

Provides links to key information like standards and technical updates. Includes such useful information as training videos, technical bulletins and advisories.

Import Functions

Allows the population of the database in an export/import spreadsheet format.

Real-Time Information Gives You Control!

Simplify Your Job And Enhance Your Safety Program With i-Safe™

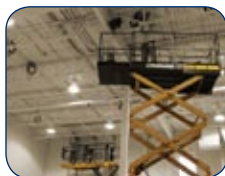

Countless Applications

Oil/Gas

Transportation

Maintenance, Repair and Operations (MRO)

Utilities

Construction

Inventory Distribution

JIT inventory information allows you to transfer blocks of equipment from site to site. A quick scan shows inspection status and equipment age.

For more information regarding i-Safe™ Intelligent Safety System contact your Capital Safety representative.

Periodic Inspection

i-Safe™ shows when inspection is due, provides inspection criteria and records completion.

Information Management

Customized reports enable cost-saving accountability and audits. The web portal provides instant access to product information.
